

Class Assessment Report

This PDF represents a dummy class-level assessment report generated by the system after the assessment portal is closed.

Course	CSC-224 - Database Systems
Assessment	Assignment #2 - SQL and Normalization
Faculty	Rafay Khan
Program / Batch	BS Computer Science - Batch 2026
Section / Semester	Section A - Semester 4
Total Marks	50
Report Status	Generated

Class Summary

Metric	Value
Total Students	45
Submitted	41
Not Submitted	4
Average Marks	38.6 / 50
Highest Marks	49 / 50
Lowest Marks	21 / 50
Class Average Percentage	77.2%

Performance Distribution

Category	Range	Students
Excellent	85% - 100%	12
Good	70% - 84%	18
Average	50% - 69%	10
Needs Improvement	Below 50%	5

System Generated Observations

Most students demonstrated acceptable understanding of SQL queries and basic normalization concepts. A small group needs improvement in decomposition, dependency identification, and writing accurate relational

schemas.

Suggested faculty action: revise functional dependency analysis, provide one additional practice task, and review common mistakes in 2NF and 3NF conversion.
