

Student Evaluation Report

This PDF represents a dummy AI-assisted evaluation report generated after checking a student submission.

Student Name	Abdul Rehman
Registration No	NUM-BSCS-2024-01
Course	CSC-224 - Database Systems
Assessment	Assignment #2 - SQL and Normalization
Obtained Marks	43 / 50
Percentage	86%
Evaluation Status	Evaluated

Rubric Based Evaluation

Rubric Item	Marks	Feedback
Schema Conversion	13 / 15	Most entities and relationships were correctly converted.
Primary and Foreign Keys	9 / 10	Keys were mostly accurate with minor naming inconsistency.
Normalization Explanation	12 / 15	Good explanation of 1NF, 2NF, and 3NF.
Clarity and Formatting	9 / 10	Submission is readable and well structured.

AI Feedback Summary

The submission shows strong understanding of relational schema conversion and normalization. The student should improve precision in explaining foreign key constraints and avoid mixing relationship tables with core entity tables.

Recommended improvement: revise examples of transitive dependency and include clearer mapping from ERD relationships to foreign keys.
